**Amendments to the Claims**

Please cancel originally filed claims 1-20.

Please add the following new claims:

**Listing of Claims:**

--21. A method for displaying products, said method comprising the steps of:

- (a) providing a display rack, said display rack having a substantially horizontally oriented member including first and second opposite ends, and a securing portion associated with said second end of said substantially horizontally oriented member,
- (b) securing said display rack to a substantially vertically oriented surface using said securing portion,
- (c) placing at least one of said products on said display rack, and
- (d) contacting a slideable carriage with said at least one product.

22. The method of claim 21, wherein said substantially vertically oriented surface includes openings for removably engaging said securing portion.

Serial No.: Not yet Assigned  
Docket No.: 57210-5023  
Page -3-

23. The method of claim 21, wherein said substantially horizontally oriented member having a generally planar upper surface.

24. The method of claim 23, wherein said substantially horizontally oriented member forms a non-right angle with said substantially vertically oriented surface.

25. The method of claim 21, wherein said step of securing said display rack to a substantially vertically oriented surface further comprises engaging at least one peg hook on said display rack with an opening in said vertically oriented surface.

26. The method of claim 21, wherein said products are photo albums.

27. The method of claim 21 further comprising a step of engaging said slidable carriage with said substantially horizontally oriented member, said carriage slidable away from and toward said vertically oriented surface.

28. The method of claim 21, wherein said substantially horizontally oriented member comprises a first elongated member having a generally round cross section and a second elongated member having a planar surface.

29. The method of claim 21, wherein said slidable carriage includes an engagement member adapted to engage said substantially horizontally oriented member.

30. The method of claim 21, wherein said second ends of said substantially horizontal members are turned up at a non-right angle.

31. The method of claim 21, wherein said display rack has an elongated upper surface.

32. The method of claim 31, wherein said step of placing at least one of said products on said display rack includes a step of placing at least one of said products on said elongated upper surface of said display rack, whereby said at least one of said products substantially entirely rests upon said upper surface.

33. The method of claim 21, wherein said substantially horizontally oriented member comprises first and second elongated members that are spaced apart and are substantially parallel.

34. The method of claim 33, wherein said slidable carriage comprises a middle portion extending between and above said first and second elongated members, and a pair of engagement members that slidingly engage said first and second elongated members.--
